VEROXA

Business Process Management Solution

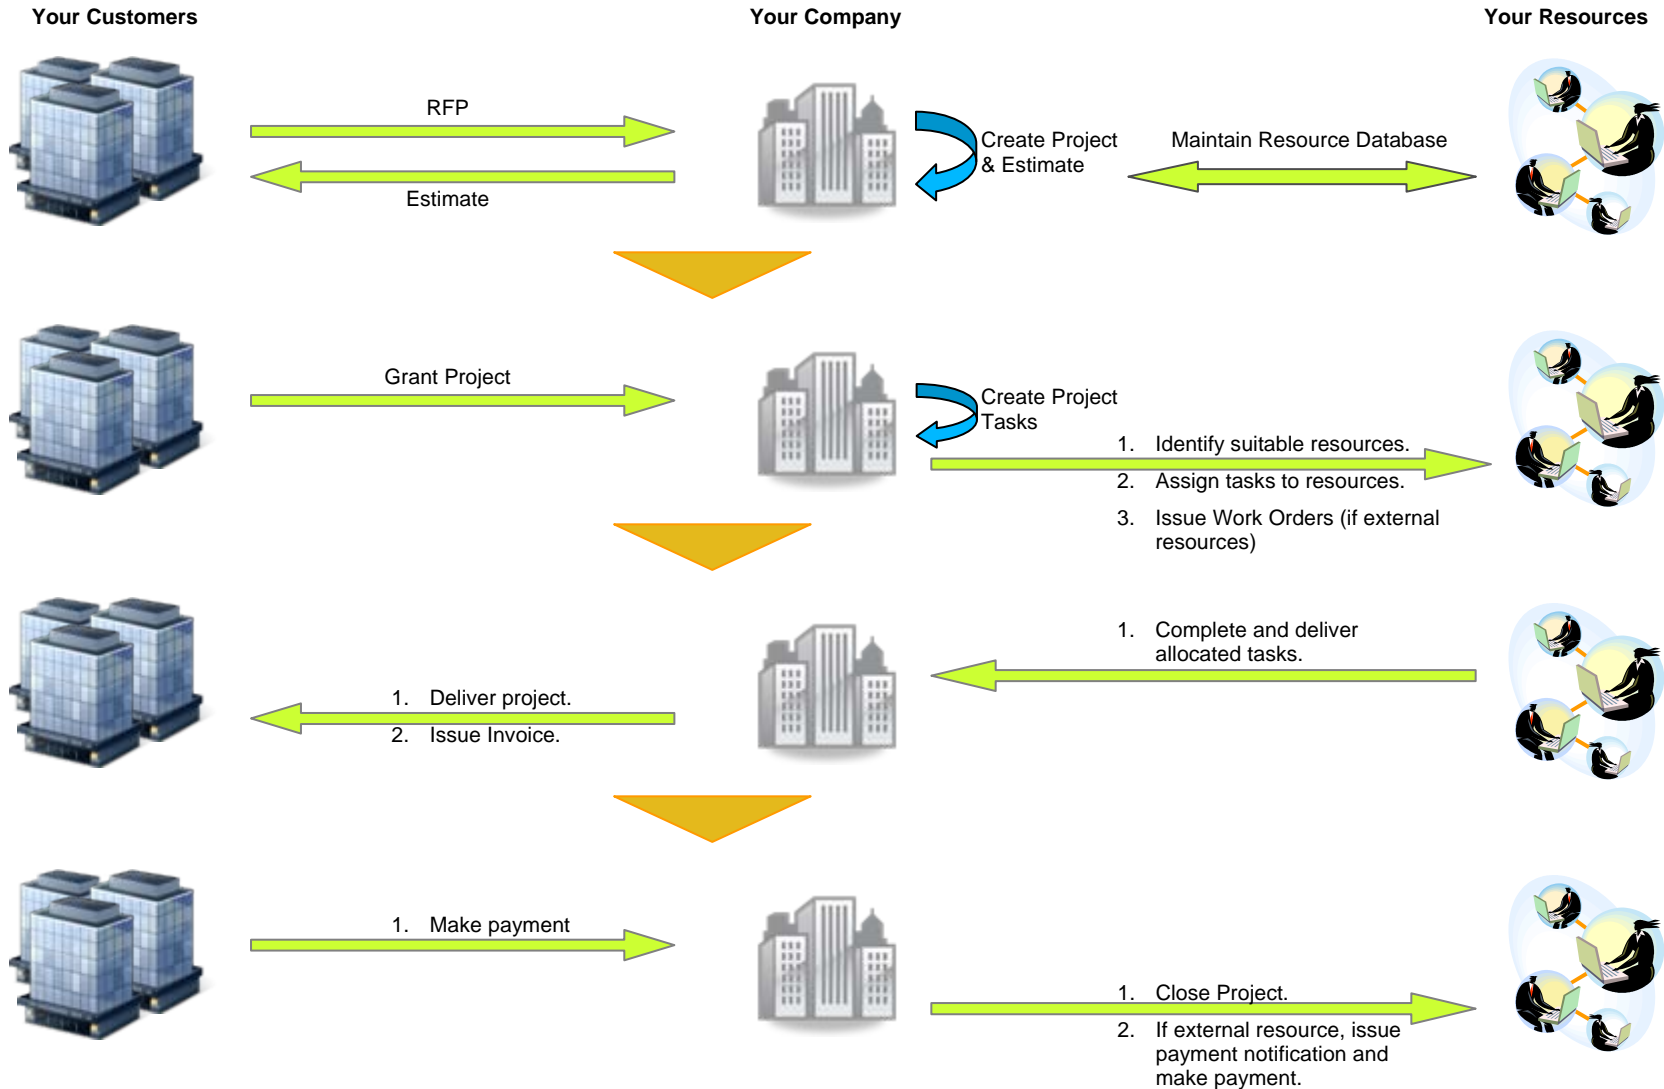

Indicus Software VEROXA is a web based **Business Process Management Solution (BPMS)** that can be used by **project-based organizations** to manage their business processes, functions, vendors or sub-contractors, projects, project payments and a whole lot more. **VEROXA** enables the organization to have complete control on various aspects of their business, increases organizational efficiency and productivity and greatly strengthens its ability to serve its customers better.

The system has been developed using the **CERIUM** Web Development Framework (an Indicus Software product) and also makes use of various Web 2.0 elements to enhance user experience.

- Feature Highlights:
 - Bilingual System (English and Japanese)
 - CRM – Account Management
 - Project Management
 - Task Management
 - Resource Management
 - Reports
 - Advanced Search Mechanism
 - Powerful Email Based Alerts Mechanism
 - System Configuration
- Highly customizable and expandable
- Easy to use interface; very low learning curve.
- Powered by the Indicus Software CERIUM Web Development Framework
- Web 2.0 Elements powered by AJAX and Java
- CSS Based Application Styling – customizable UI with your own branding

Workflow Overview

NOTE: Resource could be a staff member, a freelancer or a vendor company.
